

## Car or Storage Shelters

Car/Storage Shelters over 108 sq ft., like in the picture above, are considered accessory structure and require a building permit as per the Municipality of West Perth Zoning By-Law 100-1998 and must meet the set-back requirements of 5 feet from side and rear lot lines. Similar structures 108 sq. ft or less do not need a building permit but still must meet the set-back requirements of 5 ft from the side and rear lot lines.
